As a tribute to June being the pride month, When we celebrate self-affirmation, dignity, equality and increased visibility of the LGBTQ+ community across the world, we present the second edition in the flashback series as a part of the Insight Monthly where we bring to you a series of articles which were released some years ago and were loved immensely by the readers.

This article, launched as a part of the first print issue of the Autumn Semester back in 2016, aims to explore the various opinions from people of diverse backgrounds in insti making an attempt to gauge the amount of acceptance this community has on the campus.

The questions raised in the piece still seem pretty relevant to be asked even after 4 years, with the total and complete acceptance on the campus still being an issue!
